FACT SHEET

PART III, OPERATING UNIT GROUP 15, 331-C STORAGE UNIT

UNIT DESCRIPTION

The 331-C Storage Unit was a dangerous waste container storage unit in the south end of Hanford's 300 Area. Here the Permittees collected, consolidated, packaged, stored, and prepared dangerous waste for transport and disposal. The waste stored at the 331-C Storage Unit consisted of:

- Listed waste from specific and nonspecific sources.
- Discarded commercial chemical products.
- Characteristic waste.
- Criteria waste.

On February 8, 2011, PNNL completed removal of waste stored at the 331-C Storage Unit. The majority of the waste stored at the 331-C Storage Unit was transferred offsite for treatment and disposal.

CLOSURE

The Permittees have completed closure activities following the approved Closure Plan in Revision 8C of this Permit. Ecology accepted the Independent Qualified Registered Professional Engineer certification of Clean Closure on July 22, 2011. This is the final step in removing the 331-C Storage Unit from the Hanford Dangerous Waste permit.

REQUESTED VARIANCES OR ALTERNATIVES

There are no requested variances or alternatives for 331-C.

STATE ENVIRONMENTAL POLICY ACT (SEPA)

The SEPA determination for the 331-C is in the Hanford-Wide Permit Fact Sheet.
